  HTML, CSS, Tailwind CSS
- **Javascript Frameworks**
  React, Next.js
- **Other Tools:**
  Git, Rest APIs, Supabase

💡 Soft Skills

- **Communication and Collaboration**
- **Problem Solving and Critical Thinking**

Profile

I am a 3rd-year computer science student passionate about frontend development and creating visually appealing webpages with excellent user experiences. My strong communication skills and problem solving mindset make me an aspiring technopreneur.

Recent Projects

Godam Management

A complete store management application made using React JS and Tailwind for frontend and Supabase for backend. This application also includes features like statistics to display current status and provides appropriate feedback to every user action.

See demo

Task Hub (Under development)

An employee management application made using Next JS and Tailwind for frontend and Supabase for backend. The application allows users to manage employees within the organization and assign tasks flexibly between any two users.
